CONTENTS

Preface *xix*

Acronyms/Abbreviations *xxv*

Chapter 1 **INFORMATION TECHNOLOGY (IT): Leveraging Modern Business and Management** **1–41**

Chapter Quest *1*

1.1 Knowledge Era *2*
- 1.1.1 Three Dimensions of Modern Business *2*
- 1.1.2 Focus of IT *3*
- 1.1.3 Potential Contributions of IT to Business *3*

1.2 Business Functions *7*

1.3 Management Functions *7*

1.4 Challenges Faced by Business in Knowledge Era *7*

1.5 Business as Glass Box (Three Dimensions of Business) *8*

1.6 Business: Line and Support Functions *9*
- 1.6.1 Line Functions *10*
- 1.6.2 Support Functions (Staff Functions) *12*

1.7 Modern Management Functions *14*
- 1.7.1 Three Levels of Management *14*
- 1.7.2 Responsibilities of Top Management *14*
- 1.7.3 Modern Managerial Functions *15*

1.8 Information Technology *20*
- 1.8.1 Information Systems *21*
- 1.8.2 Communication Systems *21*
- 1.8.3 Modern Communication Technology *21*

1.9 Tactical IT Applications in Business *21*
- 1.9.1 What are Tactical IT Applications? *22*
- 1.9.2 Tactical Applications *22*

1.10 Strategic IT Applications *22*
1.10.1 What are Strategic IT Applications? *23*
1.10.2 Strategic IT Applications *23*
1.11 Enormity of the Business Processes and Their Interaction with IT *23*
1.11.1 Logical Interface between Business, IT Applications and the Computer Database *24*
1.12 Interaction between Business and IT *25*
1.13 Need for Integrated Business Applications (IBA) *26*
1.13.1 Disintegrated Information Systems/IT Applications *26*
1.13.2 Drawbacks of Disintegrated Information Systems *27*
1.13.3 Attributes of IBA/ERP *27*
1.13.4 Advantages of IBA/ERP *27*
1.14 Constituents of IT Applications in Business *28*
1.15 Business and Its Environments *29*
1.16 Information Technology Makes Businesses More Competitive *29*
1.17 Business Processes *32*
1.18 Information Technology: Leveraging the Business *33*
Sum Up *40*

Chapter 2 **DECISION MAKING IN BUSINESS (Data, Information, Knowledge and Wisdom)** **42–54**

Chapter Quest *42*
2.1 Introduction *42*
2.2 Data *43*
2.2.1 Data Processing *43*
2.3 Information *44*
2.4 Knowledge *48*
2.5 Knowledge Base of the Business *48*
2.6 Wisdom *49*
2.7 Decisions *49*
2.8 Action *49*
2.9 Feedback *49*
2.10 Business Managers *49*
2.11 Business Entities and Events *50*
2.12 Entities *51*
2.13 Events *51*
2.14 Logical Database *51*
2.15 Data Types *51*
2.16 Management Information—A Super Resource *52*
2.16.1 Management Information and Business Knowledge as Business Resources *52*
2.16.2 Management Information and Business Knowledge (Super Resources) Help Manage Other Resources More Profitably *53*
Sum Up *54*

Chapter 3 **CONSTITUENTS OF IT APPLICATIONS IN BUSINESS** **55–64**

Chapter Quest *55*
3.1 Introduction *56*
3.2 People *56*
3.2.1 People Outside the Organization *56*
3.2.2 Service Providers/Vendors *57*
3.2.3 Criteria for the Selection of Service Providers *59*
3.3 People within the Organization *59*
3.3.1 Top Management's Responsibilities *60*
3.3.2 Responsibilities of the Functional Managers and Department Heads *61*
3.3.3 Business Operational Users (Transaction Processors) *63*
3.3.4 Business Processes *63*
3.4 Data/Information *63*
3.5 Computer Software *64*
3.6 Computer and Network Infrastructure *64*
Sum Up *64*

Chapter 4 **INFORMATION TECHNOLOGY: Tactical Applications in Business** **65–86**

Chapter Quest *65*
4.1 Introduction *66*
4.2 Batch Processing System (Electronic Data Processing—EDP) *66*
4.2.1 Advantages of Batch Processing *67*
4.2.2 Limitations of Batch Processing *68*
4.3 On line Transaction Processing System (OLTPS) *68*
4.3.1 Flowchart Indicating OLTPS Pertaining to Purchase Function (Macro Level) *69*
4.3.2 Flowchart Indicating OLTPS Pertaining to Sales Function (Macro Level) *70*
4.3.3 Advantages of OLTPS *72*
4.4 Management Information System (MIS) *73*
4.4.1 Illustrative Examples of MIS *73*
4.4.2 Advantages of MIS *74*
4.5 Office automation systems (OAS) *74*
4.6 Business Intelligence (BI) and Executive Information System (EIS) *78*
4.6.1 Sources and Types of Information Associated with EIS/BI *78*
4.6.2 Characteristics/Attributes of Effective EIS *79*
4.6.3 Examples of EIS *80*
4.6.4 Business Intelligence (BI) *80*
4.7 Knowledge Management System (KMS) *80*
4.7.1 Categories of Business Knowledge *82*
4.7.2 Advantages of KMS *82*

4.8 Geographic Information System (GIS) *82*
4.9 On Line Analytical Processing System (OLAPS) *83*
4.10 On Line Complex Processing System *84*
4.11 Workflow Management Systems *84*
4.12 Groupware Applications *85*
4.13 Web Publishing (website on Internet) *85*
Sum Up *86*

Chapter 5 **INFORMATION TECHNOLOGY: Strategic IT Applications in Business** **87–121**

Chapter Quest *87*
5.1 Introduction *88*
5.2 Integrated Business Applications (IBA/ERP) *88*
5.2.1 Introduction *88*
5.2.2 Logical Structure of IBA/ERP in Business *88*
5.2.3 What IBA/ERP Does to the Business? *88*
5.2.4 Business Processes Automated Through IBA/ERP *89*
5.2.5 IBA Software Packages (IBASP) *93*
5.3 Supply Chain Integrated Business Applications (SC-IBA) *93*
5.3.1 Introduction *93*
5.3.2 Supply Chain Entities *93*
5.3.3 Logical Structure of Supply Chain Integrated IBA *93*
5.3.4 IT Applications Associated with SC-IBA *93*
5.3.5 Privacy and Security Concerns *96*
5.3.6 Benefits of Supply Chain Integrated Applications *96*
5.3.7 SC-IBASP *97*
5.4 Sales Force Automation (SFA) System *97*
5.5 Customer Relationship Management (CRM) *98*
5.5.1 Introduction *98*
5.5.2 CRM Objectives *98*
5.5.3 CRM in Knowledge Economy *99*
5.5.4 Components of CRM System *99*
5.5.5 CRM Applications in Business *99*
5.6 E-business *102*
5.6.1 Benefits of E-business *103*
5.6.2 Benefits of E-business to the People/Customers *104*
5.6.3 E-business Application Software *105*
5.6.4 E-business IT Infrastructure (Logical Diagram) *105*
5.6.5 E-business Challenges *105*
5.6.6 E-business Strategy *106*
5.6.7 Wrong Notions of E-business *107*
5.7 Logistics and Goods in Transit Tracking Systems *107*
5.7.1 Global Positioning System (GPS) *108*

5.8 Product Development Life Cycle (PDLC) Management System *108*
5.9 Data Warehouse and Data Mining *109*
5.9.1 Data Warehouse *109*
5.9.2 Business Usage-based Classification of Data (Files/Database) *110*
5.9.3 Advantages of Data Warehouse *110*
5.9.4 Components of Data Warehouse System *111*
5.9.5 Data Mining *112*
5.9.6 Models Used in Data Mining *112*
5.9.7 Advantages of Data Mining to Business *113*
5.10 Decision Support Systems *113*
5.10.1 Components of DSS *113*
5.10.2 Benefits of DSS to Business *115*
5.11 Expert System *115*
5.12 Case Studies (Part 1) *116*
5.12.1 Materials Purchases and Suppliers' Bills Payable System *116*
5.12.2 Retrospective Price Increases *118*
5.12.3 Retrospective Revision of Taxes *118*
5.12.4 Extension of Vehicles Warranty Period *118*
5.12.5 Vehicles to Reach the Markets Quicker *119*
5.13 Case Studies (Part 2) *119*
5.13.1 Integration of Business Functions *119*
5.13.2 Executive Information Systems (EIS) *120*
Sum Up *121*

Chapter 6 **INFORMATION TECHNOLOGY APPLICATIONS IN MANAGEMENT FUNCTIONS** **122–136**

Chapter Quest *122*
6.1 Introduction *123*
6.2 Selection of Business, Setting Objectives and Framing Policies *123*
6.2.1 IT Support in Selection and Setting Business Objectives and Policies *123*
6.3 Establishing Systems and Procedures (Business Process Manuals) *124*
6.3.1 IT Support in Establishing Systems, and Procedures *124*
6.4 Planning *124*
6.4.1 Strategic Planning *124*
6.4.2 Tactical Planning *125*
6.5 Organizing *127*
6.5.1 Organization Structure *127*
6.6 Staffing (HR Positions and Recruitment) *128*
6.7 Coordination/Collaboration (Integration) *129*
6.7.1 Work Groups Applications/KMS *129*
6.7.2 Workflow Management and E-Approvals *129*

6.7.3 Networked Organization Structure *130*
6.7.4 Integrated Business Applications *130*
6.8 Communication *130*
6.9 Control *131*
6.9.1 Budget Control (Targets vs. Actual) *131*
6.9.2 Functional Controls *132*
6.10 Compliance Management *132*
6.11 Risk Management *132*
6.12 Decision Making *133*
6.13 Innovation *133*
6.14 IT Strategy *134*
6.15 Relationship Management *134*
6.16 Knowledge Management *135*
6.17 Case Study: Performance Appraisal through Responsibility Accounting System *135*
Sum Up *136*

Chapter 7 **PRACTICAL APPROACH FOR MANAGERS IN IDENTIFYING RIGHT IT APPLICATIONS** **137–143**

Chapter Quest *137*
7.1 Introduction *137*
7.2 Potential Benefits of IT and Associative Applications *138*
7.3 Steps involved in Identifying Right IT Applications for Each Department/Business Function *138*
7.4 Indicative List of CSFs and KRA *140*
7.4.1 Marketing *140*
7.4.2 Production *141*
7.4.3 Procurement/Materials Management *141*
7.4.4 Finance *142*
7.4.5 Personnel (HR) *143*
Sum Up *143*

Chapter 8 **DESIGN AND IMPLEMENTATION OF INTEGRATED BUSINESS APPLICATION SOFTWARE PACKAGE (IBASP) FOR BUSINESS: Software Development Life Cycle Activities—SDLC (Waterfall Method)** **144–186**

Chapter Quest *144*
8.1 Introduction *145*
High Level Design (HLD) *146*
8.2 Requirement Analysis, Systems Analysis and Requirement Specifications *147*
8.2.1 'As is' Study of Existing Business Requirement Analysis *147*
8.2.2 Systems Analysis/Business Process Engineering *150*
8.2.3 Feasibility Analysis *153*

8.2.4 Logical Database *154*
8.2.5 Requirement Specifications/'To Be' Processes Documentation *154*
8.3 IT Infrastructure Design, Project Costing and Implementation Schedule *156*
8.3.1 Infrastructure Design *156*
8.3.2 Software (IBASP) Development Efforts and Cost Estimation *157*
8.3.3 IBASP Development Cost Estimation *160*
8.3.4 Metrics and Measures *161*
8.3.5 Project Approval *162*
8.4 System Design and System Specifications *162*
8.4.1 Data Flow Diagram *163*
8.4.2 System Design *163*
8.4.3 System Flowchart *164*
8.4.4 System Specifications *164*
8.4.5 Systems Audit *167*
8.4.6 Software Engineering—Quality Assurance *168*
8.5 Programming and Testing *168*
8.5.1 Program Specifications *168*
8.5.2 Program Flowchart *169*
8.5.3 Programming *169*
8.5.4 Program 'Walk-thru' *170*
8.5.5 Program Compilation and Unit Testing *170*
8.5.6 Application Package (IBASP) Integration Testing and Moving to 'Base Line' *171*
8.6 User Training, Installation of Computer Resources and IBASP Implementation *171*
8.6.1 Business Users Training *172*
8.6.2 Acquisition and Installation of Computer Resources *172*
8.6.3 Data Conversion/Data Migration *173*
8.6.4 Implementation of New IBASP *173*
8.6.5 User Manuals/On line Help *175*
8.6.6 Intimation to Managers and Business Associates *175*
8.6.7 IBASP Implementation *176*
8.7 IBASP—Documentation and Maintenance *176*
8.7.1 System Documentation *176*
8.7.2 IBASP System Reliability *177*
8.7.3 IBASP Project—Metrics and Measures *178*
8.7.4 Post-implementation Audit *178*
8.7.5 Data Backup *179*
8.7.6 Software Updates and Upgrades *179*
8.7.7 Configuration Management *180*
8.7.8 Managing Computer Resources (Network Support) *181*
8.8 Life Cycle Support Activities *181*
8.8.1 Procurement of Computers *181*
8.8.2 Procurement of Software *181*

8.9 Systems Audit *181*
8.10 End User Methodology *182*
8.10.1 Benefits *182*
8.10.2 Drawbacks *182*
8.11 Ready to Use Application Packages ERP *183*
8.11.1 Circumstances When ERP Software is Chosen *183*
8.11.2 Merits of ERP Packages *183*
8.11.3 Demerits of ERP Packages *183*
8.12 IBASP Development—Outsourcing *184*
8.12.1 Benefits *184*
8.12.2 Disadvantages *184*
8.12.3 When Not to Outsource *185*
8.13 Customized IBASP (Developed In-house or Outsourced) *185*
8.13.1 Merits *185*
8.13.2 Demerits *185*
8.14 Rapid Application Development (RAD) *185*
Sum Up *186*

Chapter 9 **IT APPLICATIONS' INTEGRITY, AUDIT AND CONTROL AND ATTRIBUTES OF IDEAL IT APPLICATIONS IN BUSINESS** **187–206**

Chapter Quest *187*
9.1 Business Expectations of IT *188*
9.2 Characteristics and Attributes of Ideal IT Applications in Business (20 Points Approach) *188*
9.3 Integrity of IT Applications *191*
9.4 Information Systems Audit and Control *193*
9.5 IT Management Controls *194*
9.5.1 Top Management Control *194*
9.5.2 Information Technology Services Division (ITSD): Management Control *195*
9.5.3 General Controls to be Followed by ITSD *195*
9.6 IT Applications/Systems Integrity Controls *196*
9.6.1 Authenticity Control *196*
9.6.2 Accuracy Control *196*
9.6.3 Integrity Controls *197*
9.6.4 Completeness Control *198*
9.6.5 Redundancy Control *198*
9.6.6 Data Security Control *198*
9.6.7 Existence Control *199*
9.6.8 IT Assets Safeguarding Control *199*
9.6.9 Effectiveness Control *199*
9.6.10 Efficiency Control *200*
9.6.11 Testing Control *200*

9.6.12 Documentation Control *200*
9.6.13 Preventive Control *200*
9.6.14 Detective Control *201*
9.6.15 Corrective Control *201*
9.6.16 System Controls *201*
9.6.17 System Audit Controls *202*
9.6.18 Quality Assurance *202*
9.7 Case Studies *202*
9.7.1 Data Integrity Controls Established in Materials Purchase and Supplier Bills Payable System *202*
9.7.2 Employee Fraud *204*
9.7.3 Manager's Unethical Practice *205*
Sum Up *206*

Chapter 10 **SECURITY OF IT RESOURCES INCLUDING BUSINESS DATA AND INFORMATION** **207–217**

Chapter Quest *207*
10.1 Introduction—Need for Data Security? *207*
10.2 Security Issues Concerning IT Applications in Business *208*
10.3 Security Techniques *208*
10.3.1 Data Encryption *208*
10.3.2 Cryptography *208*
10.3.3 Encryption Program Logic *209*
10.4 Symmetric Cryptography *209*
10.4.1 Symmetric Encryption Method (Ensuring Message Security) *210*
10.5 Asymmetric Cryptography (Ensuring Confidentiality and Authentication) *210*
10.5.1 Key Pairs Used to Provide Confidentiality *211*
10.5.2 Key Pairs Used to Provide Authenticity *211*
10.5.3 Key Pairs Used to Provide Authenticity and Confidentiality *211*
10.5.4 Combining of Symmetric and Asymmetric Cryptography *212*
10.6 Digital Envelope *212*
10.7 Hashing *212*
10.8 Digital Signature *212*
10.8.1 Digital Certificate/Digital ID *213*
10.9 Certification Authority *213*
10.10 Good Encryption/Authentication Practices *213*
10.11 Firewalls *214*
10.11 Software Piracy/Security *215*
10.13 Internet (Information) Robbery *215*
10.14 Cyber-crimes *215*
10.15 Hacking *216*
10.16 Cyber Theft *216*
10.17 Consumer Privacy Issues *217*
Sum Up *217*

Chapter 11 **COMPUTERS: Structure, Networks and Architectures** **218–241**

Chapter Quest *218*

11.1 Logical Structure of Computer (John Von Neumann Architecture) *219*
11.2 Central Processing Unit (CPU) *219*
11.2.1 Complex Instruction Set Computers (CISC) Processor *220*
11.2.2 Reduced Instruction Set Computers (RISC) Processor *220*
11.3 System Bus/Channel *221*
11.3.1 Other Ratings Used for the Processors *221*
11.3.2 Computer Instructions *221*
11.4 Computer Main Memory (DRAM) *221*
11.5 CACHE Memory *222*
11.5.1 Special Memory Units *223*
11.6 Data Storage Devices *223*
11.7 Input (Multimedia) Devices *225*
11.8 Output (Multimedia) Devices *228*
11.9 Networking Hardware *230*
11.9.1 Network Interface Cards (NIC) *230*
11.9.2 Modems *230*
11.9.3 Structured Cabling *230*
11.9.4 Hubs/Switches/Routers/Gateways/Bridges *231*
11.9.5 Computer Network—Mediums *231*
11.9.6 Mobile Devices *232*
11.9.7 Wireless LANs *232*
11.9.8 Power Supply—Generators and UPS *232*
11.10 Criteria for the Selection of Computer Hardware *232*
11.11 Computer Architecture *234*
11.11.1 Proprietary Systems/Main Frame Computers *234*
11.11.2 Open Systems/Client Server Architecture *235*
11.12 Network Architecture *236*
11.14 Generations of Computers *240*

Sum Up *240*

Chapter 12 **COMPUTER SOFTWARE, CASE TOOLS AND GOOD PROGRAMMING PRACTICES** **242–263**

Chapter Quest *242*

12.1 Introduction *243*
12.2 Classification of Software *243*
12.3 Interface Layers between Users and the Hardware *244*
12.4 Operating Systems (O/S) *244*
12.5 Other System Softwares *246*
12.6 Networking Operating System (NOS) *247*
12.7 Programming Languages *247*
12.7.1 Types of Programming Languages *248*

12.8 Application Software *249*
12.8.1 Integrated Business Application Software Package (IBASP) *249*
12.8.2 General Purpose/Utility Software Packages *249*
12.8.3 Utility Programs *250*
12.8.4 General Purpose Application Packages *250*
12.8.5 Application Specific Software Packages (ASP) *250*
12.8.6 IBASP/ERP Packages *251*
12.9 Office Automation Software *251*
12.10 Front End Tools *251*
12.11 CASE Tools *251*
12.12 Principles of Good Programming *251*
12.13 Computer Aided Software Engineering (CASE) *253*
12.13.1 Advantages of CASE *254*
12.13.2 CASE Tools *255*
12.14 Computer Virus *256*
12.15 Software and Hardware Interface *257*
12.16 Procurement of Software—Criteria for the Selection of Software *258*
12.17 Application Architecture (Platforms) *260*
12.18 Case Study—Distributed Computing *263*

Sum Up *263*

Chapter 13 **DATA AND DATABASE MANAGEMENT SYSTEMS** **264–284**

Chapter Quest *264*

13.1 Introduction *265*
13.2 Data Processing *265*
13.3 Database, Data Dictionary and Data Structures *266*
13.4 Data Storage Devices, File Organization and Access Methods *268*
13.5 Logical Structure of Database *272*
13.6 Steps Involved in the Creation of DBMS *273*
13.7 Entity/Event Relationship Diagrams *273*
13.8 Rules for Deciding Record Structures *274*
13.9 DBMS: Files/Records/Data Management Functions *276*
13.10 Functions and Advantages of DBMS/RDBMS *276*
13.11 DBMS Implementation Methodologies *278*
13.12 Data Administration/Database Administration *280*
13.13 Structured Query Language (SQL) *281*
13.14 Data Backup and Restoration *281*
13.15 Data Warehouse and Data Mining *282*
13.16 Advantages of Database to the Business *282*
13.17 Data Concurrency *282*
13.18 Methods of Collecting Data *283*
13.19 Data Independence *283*

Sum Up *284*

Chapter 14 **SYSTEM THEORY AND INFORMATION SYSTEMS** **285–288**

Chapter Quest *285*

14.1 Introduction *285*
14.2 Comparisons of Three Known Systems *286*
14.3 What the Systems Theory Advocates? *286*
14.4 Two Way Approach Leading to Better Understanding of a System *287*
14.5 How IT Applications Relate to Systems Theory *287*
14.6 Systems Theory Concepts *287*
14.7 Logical Components of Information Systems *288*

Sum Up *288*

Chapter 15 **INFORMATION TECHNOLOGY SERVICES DIVISION (ITSD): Functions and Responsibilities** **289–296**

Chapter Quest *289*

15.1 Introduction *290*
15.2 Mission *290*
15.3 Focus *290*
15.4 Role/Functions of ITSD *290*
15.5 Business Organization *291*
15.6 ITSD—Typical Organization Structure *292*
15.7 ITSD—Responsibilities of Technical Functions *292*

Sum up *296*

Chapter 16 **IT APPLICATIONS IN SELECT SERVICE INDUSTRIES (Banks, Hospitals and Hotels) AND E-GOVERNANCE** **297–313**

Chapter Quest *297*

16.1 Banks *297*
16.1.1 Core Banking Solution (CBS) *298*
16.1.2 Internet Banking (Online Banking) *299*
16.1.3 POS (Point of Sales) Devices—ATM/Debit Cards/ Credit Cards/E-Wallet *299*
16.1.4 ATM Services *300*
16.1.5 Mobile Banking *301*
16.1.6 Branchless Banking (Bank and Non Bank Based) *301*
16.1.7 Payment Services/ECS *302*
16.1.8 Online Trading *302*
16.1.9 Impact of Information Technology on Banking Services *303*
16.1.10 Other IT Applications at Banks *303*

16.2 Hospitals *303*
16.2.1 Websites *304*
16.2.2 Hospital Portals *304*
16.2.3 Patients' Clinical Information System *304*
16.2.4 In-patients Billing Systems *305*

16.2.5 Hospital Beds and Operation Theatres Allocation/Occupancy Monitoring Systems *305*
16.2.6 Hospital Pharmacy Management Systems *306*
16.2.7 Medical Insurance Claims for In-patients *306*
16.2.8 Issue of Discharge Summaries for In-patients *306*
16.2.9 Quality Rating for the Hospitals *306*
16.2.10 Other IT Applications *307*

16.3 Hotels and Resorts (Property Management) *307*
16.3.1 Hotels and Resorts—Internet Portal *307*
16.3.2 Guest Billing Systems *308*
16.3.3 Guests Tour and Travel Planning System *308*
16.3.4 Restaurant Reservation, Ordering of Food and Billing *308*
16.3.5 Hotel Room Reservation and Occupancy Monitoring Systems *309*
16.3.6 CRM for Hotels and Resorts *309*
16.3.7 Other IT Applications *309*

16.4 E-governance in India *309*
16.4.1 Introduction *309*
16.4.2 Tamil Nadu State Government (TNSG) *310*
16.4.3 E-governance Infrastructure *310*
16.4.4 TNSG E-governance Mission *310*
16.4.5 E-governance Objectives *311*
16.4.6 Services Offered by all Government Departments (of TNSG) *311*
16.4.7 Department Specific E-governance Services (Select Departments) *311*

Sum Up *313*

Chapter 17 **INFORMATION TECHNOLOGY: Genuine Concerns for Humanity** **314–323**

Chapter Quest *314*

17.1 Introduction *314*
17.2 Social Concerns—Favourable Contributions *315*
17.3 Social Concerns—Adverse Contributions *316*
17.4 Privacy Concerns *317*
17.5 Health Concerns *318*
17.6 Ethical Issues *319*
17.7 E-fraud/Cyber Crimes *319*
17.8 Cyber Terrorism *321*
17.9 Dos' and Don'ts for Information Technology/Internet Users *322*

Sum Up *323*

Index ***325–336***

INFORMATION TECHNOLOGY

Best Practices and Applications in Business

T.A. Adikesavan

Today, Information Technology (IT) offers hundreds of solutions/applications for any type of business. Therefore, it is necessary to have a good knowledge of all such applications. This book describes all possible IT applications in business today to enable the readers to understand the scope and benefits of individual applications and their relevance to business.

The book discusses all business processes and modern management functions and shows how IT solutions get mapped onto them. It explains the potential of IT and how technology leverages the business and makes it more competitive. The book also emphasizes that the success of IT applications depends on people, top management, functional managers, operational users and software engineers. Besides, it discusses the attributes of ideal IT applications in business and how to achieve them, and system control to be incorporated in IT applications in ensuring their integrity, reliability, accuracy and security. The book explains best IT practices in business with real examples, case studies, tables and diagrams.

The book is meant for the postgraduate students of management. Besides, professionals working in the field will also find the book immensely useful.

THE AUTHOR

T.A. ADIKESAVAN is a Management Consultant and a Visiting Faculty, University of Madras, Chennai. He has more than 35 years of industrial experience and 12 years of teaching experience.
