

I am very much thankful to Professor G C Beri — my friend and ex-senior colleague at South Gujarat University, Surat — who introduced me to the present publishers and pursued it up to the

My special thanks to Tata McGraw-Hill (TMH) and particularly to Mr Biju Kumar, Mr Tapas final decision on publication. Kumar Maji and Mr Raza Khan of TMH, who helped me shoulder a number of responsibilities and were very cooperative. I hope this kind of relationship will continue in the future too. I also highly appreciate the help rendered to me by family members who did not allow me to

feel handicapped. My daughters Shweta and Deeksha did computer work including correspondence

The work on the book commenced during 1989 just after completion of my manuscript on with the publishers as and when required. Business Environmient Vol. I but could proceed only at a snail's pace due to non-availability of requisite literature on the subject. I am thankful to Indian Institute of Technology, Kharagpur, for granting me one year's sabbatical leave during 1993 and the Indian Institute of Management, Lucknow, for providing me all the necessary facilities for work, which enabled me to collect material and finalize the present manuscript. I express my gratitude and thanks to the authorities and individuals at both these institutes, who helped me in various ways in the completion of the

My special thanks are due to Professor S K Singh, Professor P R Banerjee, Professor Asit Banerjee and Professor Roshan Raina, librarian, at IIM Lucknow for their affectionate treatment and wholehearted support in making my stay fruitful. My research scholars Mrs Pammi Rani and Dr (Mrs) C. Subha Laxmi helped me in a number of ways in the preparation of the first draft of the manuscript. I place on record my high appreciation for the same. My heartfelt thanks are due to my neighbours and friends Professor P K J Mahapatra, Professor R B Mishra and Professor R N Tiwari for their constant encouragement and help in different ways. Professor P K J Mahapatra, Head, Department of Industrial Engineering and Management, was kind enough to provide some literature on General Systems Theory and Sub-optimization and go through some chapters of his interest including the one in question. Professor J R Rao (now retired) of Mathematics Deptt., IIT, Kharagpur had written a note on Multi Criteria Decision Approach, used in the chapter on Public Enterprise Pricing [P. 560]. Professor R N Tewari and Professor Somesh Kumar of Mathematics Department, helped in formulating illustrations for Multi-criteria Decision-making and Goal Programming. However, I alone am responsible for errors and omissions, if any. M L TRIVEDI
