

'This is far more than just another Business Economics text. Dransfield goes straight to the heart of what is important in business today. From globalization to green economics and from markets to money, the extensive range of topics and user friendly style, ensure that this text will be accessible to all students studying a business economics degree or related discipline.'

James Eden, Senior Lecturer in Economics and Finance, Liverpool John Moores University, UK

The Eurozone crisis and the age of austerity, as well as challenges to the environment as a result of economic growth, have highlighted the need for a greater understanding of those facets of economics that are of most use to businesses and their decision makers.

This book introduces all of the relevant theoretical aspects of the subject and applies them to real-life examples of economics that are of particular interest to students today, including: the impact of globalization; the way in which 'green' perspectives can be built into decision making; and how the financial crisis has challenged economists, politicians and business people to rethink their existing ideas, particularly with respect to risk management. This innovative textbook features:

- A clear introduction to the features of economics and the economy that impact upon business decision making.
- Illuminating case studies that relate business examples to economic concepts.
- Summaries, activities, key terms, review questions and further reading to help reinforce your understanding.

Clear, concise and written by an expert currently lecturing in the field, *Business Economics* examines economic theory and the practical application of economics in a way that is relevant and understandable to undergraduate students studying modules in this area.

Rob Dransfield is Senior Lecturer in Economics and Strand Leader for Business Education at Nottingham Trent University, UK. He is also Tutor for the *Financial Times* Non-Executive Directors course and has written a number of introductory and international economics books – most recently, *Economics for the Caribbean School Certificate* (2011, Nelson Thornes).

1 INTRODUCTION TO ECONOMICS FOR BUSINESS 1

Introduction	2
What is 'the economy'?	2
How the economy impacts on business	5
The management of risk	6
How changes in consumer incomes and spending affect business	9
The impact of changes in interest rates on business	11
Some key economic concepts that appear in this book	13
Summary	15

2 QUANTITATIVE ANALYSIS FOR ECONOMISTS 19

Introduction	20
An econometric approach	21
Using diagrams and simple statistical relationships	25
Making predictions	31
Relating two variables	33
Index numbers	38
Share price indices	44
Summary	45

3 HOW MARKETS WORK 49

Introduction	50
The nature of a market economy	50
The relationship between price, demand and supply	52

- The construction of demand and supply curves 55
- Changes in the conditions of demand and supply 60
- How to measure elasticity of demand 69
- The role of firms in the market 77
- Summary 80

4

COSTS AND REVENUES

85

- Introduction 86
- The nature of cost-volume-profit analysis 86
- The average cost of production 92
- Costs at different levels of output 99
- Illustrating revenues 101
- Combining cost and revenue to illustrate profit 103
- A marginal approach to profit maximizing 106
- Summary 114

5

DIFFERENT TYPES OF MARKET STRUCTURES

117

- Introduction 118
- What is market structure? 118
- Types of market structure 119
- Perfect competition 121
- Monopoly 124
- Market structures in the real world 129
- Price setting in the real world 138
- Price setting in different market settings 141
- Allocative efficiency 144
- Summary 146

6

BUSINESS STRATEGY IN AN ECONOMIC CONTEXT

151

- Introduction 152
- What business strategy involves 152
- The ingredients of strategy 154
- The criteria for an effective strategy 154
- How an environmental analysis helps to determine the suitability of a strategy 157
- The nature of strategic vision, objectives, focus and architecture 159
- Business strategy in an economic context 163
- Summary 164

7

GOVERNMENT REGULATION AND COMPETITION

169

- Introduction 170
- Government intervention 171
- The government and the market 174

- Creating a competitive environment 182
- UK competition law 183
- Other forms of government regulation 187
- Summary 190

8

THE WIDER ROLE OF GOVERNMENT IN THE ECONOMY

193

- Introduction 194
- Government's multiple roles and policies 194
- The government as producer and employer 195
- The government as a stabilizer of the economy 196
- The government's role in encouraging competitive markets 202
- The government's role in combating market failure 203
- The government's international role 203
- The government as debt manager 206
- The government and inequality 209
- Industrial and regional policy 209
- Macro-economic policy tools 213
- Summary 216

9

ECONOMIC IDEAS AND POLICY

221

- Introduction 222
- The development of economic thinking 222
- The classical economists 223
- The Marxist economists 225
- The neoclassical economists 225
- Keynesian economics 229
- The neoclassical consensus 233
- The free market revival and monetarism 235
- The 'Third Way' 237
- New ways of thinking about the economy 240
- Summary 244

10

ECONOMIC INDICATORS

249

- Introduction 250
- What are economic indicators? 250
- Indicators that show the growth of the economy 251
- Employment indicators 262
- Inflation indicators 267
- Population indicators 273
- The interest rate 276
- The exchange rate 277
- Summary 277

11

THE INTERNATIONAL ECONOMY

281

Introduction 282
 Advantages of international trade 282
 Comparative and absolute advantage 284
 The UK as a trading nation 288
 The balance of payments 288
 The UK's main trading partners 291
 The importance of trading blocs 291
 The UK and the European Union 295
 Exchange rates 301
 The euro 307
 Crisis in the Eurozone 310
 Terms of trade 313
 Summary 314

12

THE ECONOMICS OF GLOBALIZATION

317

Introduction 318
 What is globalization? 318
 Who is involved in the globalization process? 326
 The economic institutions of globalization 330
 The nature of protectionism 334
 Foreign direct investment 336
 Strategies for entering global markets 339
 Summary 343

13

MONEY, BANKING AND FINANCE

347

Introduction 348
 The significance of the financial crisis 348
 The functions of money 353
 Commercial banks 354
 Central banks 356
 The creation of credit 357
 The supply of money 360
 Monetary policy and inflation 360
 Summary 366

14

GOVERNMENT FISCAL POLICY

369

What is fiscal policy? 370
 Government spending, taxes and borrowing 371
 Types of fiscal policy 374
 Types of taxation 375
 The impact of direct and indirect taxes 378
 The impact of government subsidies 381
 Summary 385

15

GREEN ECONOMICS

389

Introduction 390
 The environmental challenge 390
 Reappraising simple economic theory 391
 Sustainable development 397
 Different forms of capital 399
 Cost-benefit analysis 399
 The sustainability spectrum 403
 Taking a wider view 404
 International collaboration for the commons 405
 Ecological footprints 408
 Sustainable business models 409
 Summary 419

16

BUSINESS IN THE ECONOMY

423

Introduction 424
 Matching business strategy with the organizational environment 424
 Uncertainty in the economic environment 429
 Institutional economics 434
 The importance of competitive advantage 437
 The size of firms in the market 443
 The growth of firms in the market 444
 Economies of scale 445
 Summary 450

17

FINANCIAL PLANNING AND INVESTMENT APPRAISAL

455

Introduction 456
 What is investment? 456
 The payback method 459
 Discounted cash flow to find net present value 460
 Accounting rate of return 464
 Sources of finance for a business 466
 Summary 471

Index
