HOW MANY SPINAL NERVES ARE PRESENT IN THE SPINAL CORD?	58

CONTENTS

ANIMAL WORLD

- HOW DO ANIMALS HIBERNATE?
- HOW MANY TYPES OF APES ARE THERE?
- HOW CAN BEARS BE DANGEROUS?
- HOW ARE RHINOS BECOMING ENDANGERED?
- HOW DO FISH SWIM AND BREATHE UNDERWATER?
- HOW LONG CAN A CAMEL GO WITHOUT WATER?
- HOW DO THE EYES OF A CAT SHINE?
- HOW DO RABBITS DIFFER FROM HARES?
- HOW FAR CAN A KANGAROO JUMP?
- HOW FAST CAN ANIMALS RUN?
- HOW ARE STRIPES A BOON TO ZEBRAS?
- HOW DOES A TIGER KILL ITS PREY?
- HOW DO MAMMALS CLEAN THEIR FUR?
- HOW MANY MAMMALS ARE THERE?
- HOW DOES A STAG GET BACK ITS ANTLERS?
- HOW ARE BEAVERS SUITED TO LIFE UNDER WATER?
- HOW DOES A DOLPHIN 'SEE' WITH THE HELP OF SOUND?
- HOW DO BATS FLY?

PLANT KINGDOM

- HOW ARE SEEDS ESSENTIAL TO PLANTS?
- HOW DOES PHOTOSYNTHESIS TAKE PLACE?
- HOW DOES POLLINATION TAKE PLACE?
- HOW DO FLOWERS GET THEIR SCENT?
- HOW DO MUSHROOMS GROW?
- HOW DO PLANTS SURVIVE IN THE DESERT?
- HOW IS CACTUS ADAPTED TO HOLD WATER?
- HOW ARE GRAPES USED IN VARIOUS WAYS?
- HOW IS RICE GROWN?
- HOW IS SUGAR MADE?
- HOW DO PINE TREES STAY GREEN ALL THE YEAR?
- HOW DOES NATURE SCATTER SEEDS?
- HOW MANY KINDS OF GRASSES ARE THERE?
- HOW DO WEEDS SPREAD?
- HOW ARE ROOTS ESSENTIAL TO PLANTS?
- HOW DOES THE SHAPE OF A LEAF VARY?
- HOW DOES THE WHEAT PLANT LOOK LIKE?
- HOW DO LEAVES CHANGE THEIR COLOURS?

SCIENCE AND TECHNOLOGY

- HOW ARE MICROSCOPES USED?
- HOW DOES A JET ENGINE WORK?
- HOW DO WE TAKE A PHOTOGRAPH WITH A CAMERA?
- HOW IS PAPER MADE?
- HOW BIG IS AN ATOM?
- HOW ARE FOOD ITEMS CANNED?
- HOW ARE PLASTICS MADE?
- HOW IS GLASS MADE?
- HOW DOES A BATTERY PRODUCE ELECTRICITY?
- HOW DOES AN ELECTRIC BULB GIVE LIGHT?
- HOW DO LASERS WORK?
- HOW DOES A COMMUNICATION SATELLITE OPERATE?
- HOW DOES A COMPUTER FUNCTION?
- HOW DO BOATS FLOAT?
- HOW IS NUCLEAR ENERGY PRODUCED?
- HOW DO SUBSTANCES CHANGE FROM ONE STATE TO ANOTHER?
- HOW DOES A MICROPHONE WORK?
- HOW DO SOAPS AND DETERGENTS PERFORM THE CLEANING ACTION?

TELL ME HOW

HOW ARE PREHISTORIC TIMES CATEGORIZED?

The geological time has been divided into three eras. The oldest era is known as the Palaeozoic era. It contains fossils from many primitive life - forms up to some of the earliest land-dwelling animals. During this era, fish, amphibians and early reptiles appeared. It lasted about 570-245 million years ago. Then, there came the Mesozoic era which lasted about 245-65 million years ago. This was the time of giant reptiles called dinosaurs. This period is further divided into three periods- the Triassic, the Jurassic and the Cretaceous Period. During the Triassic Period (245-205 million years ago), the dinosaurs began to evolve. In the Jurassic Period (205-145 million years ago), the dinosaurs reached their maximum sizes. During the Cretaceous Period (145-65 million years ago), the dinosaurs evolved into the most varied kinds of any living creatures. Finally, the third era is known as the Cenozoic era, the era in which we live.

BITS OF FACT

The largest fossil bones found are of the giant Sauropods. These bones include the 6 feet long neck vertebra of Seismosaurus and the 8 feet long shoulder blade of Ultrasaurus.
