CONTENTS

Preface v

Section-I : Introduction and Brief history of Animal Breeding

1. Introduction 1

Section-II : Selection

2. Selection 9

3. Complications of Selection 13

4. Aids to Selection 19

5. Methods of Selection (Multi-trait Selection) 29

6. Sire Evaluation 37

7. Combined Selection 43

8. Most Probable Producing Ability (MPPA) or Breeding Value
of Cow or Estimated Producing Ability (EPA) 47

9. Response to Selection/Genetic Gain 49

10. Selection Limit or Selection Plateau or Selection Ceiling 57

11. Correlated Response to Selection 59

12. Indirect Selection 61

13. Recurrent Selection and Reciprocal Recurrent Selection 63

14. Genotype, Environment Correlation and Interaction 69

Section-III : Breeding

15. Breeding/Mating System	73
16. Inbreeding	77
17. Effect of Inbreeding on Different Kinds of Gene Action	87
18. Measurement of Inbreeding and Relationship Coefficient	91
19. Estimation of Effective Number and Rate of Inbreeding in an Unpedigreed/Random Bred Population	95
20. Heterosis or Hybrid Vigour	99
21. Outbreeding Systems	105
22. Crossbreeding	107
23. Synthetic Breeds of Dairy Cattle	115
24. New Breeds of sheep	117
25. Out Crossing, Top Crossing, Line Crossing, Strain Crossing and Grading Up.	119
26. Species Hybridization	125
27. Nucleus Breeding Systems (NBS)	129
28. Current Breeding Programme in the State and the Country	135
29. Breeding Policy – Tamil Nadu	139

Section - I
**INTRODUCTION AND
BRIEF HISTORY OF ANIMAL
BREEDING**

Text book of **ANIMAL BREEDING**

This book is very much useful for the second year students of B.V.Sc. course who are studying in veterinary colleges all over India. Veterinary Council of India recently changed the syllabus for the veterinary undergraduate students so as to make uniform veterinary curriculum. In this circumstances, Livestock and Poultry Breeding, a course in the third semester seems to be a tougher one for the below average as well as average students. At present, there is no single book available to cover all the topics. A student should go through at least six to eight books which were all written in very high standard of English. Students studied in vernacular languages in their school may need a book like this one in simple English, covering all the syllabus. This book deals with History of Animal Breeding, Different methods of selection, Complications of selection, Response to selection, Inbreeding, Outbreeding, Crossbreeding, New breeds of Livestock, Nucleus Breeding System and Livestock Breeding Policy of India. This book is also useful for post graduate students of Animal Genetics and Breeding to face National Eligibility Test (NET) conducted by Agricultural Scientists Recruitment Board(ASRB), Veterinary graduates who are all pursuing competitive exams conducted by State Public Service Commissions and Biology/Veterinary graduates preparing for Union Public Service Commission.
