PREFACE

Drugs and Biologicals are extensively used for the prevention and treatment of Poultry diseases. They are supplied by pharmaceutical companies and other agencies. Some of the drugs are available as pharmacopeias or reagent grade chemicals. All the information is compiled for ready reference for veterinary clinicians. Disease diagnostic tables and trouble shootings of the hatchery are also covered apart from drugs and vaccines. This book may be very useful for the students and the poultry farmers as well.

The information about poultry drugs and vaccines used in India, is compiled in this book under different heads like:Pharmaceuticals, Premixes, Homeopathic, nonproprietary drugs and Biologicals.

Disinfectants and sanitizers are also included in this book

Currently available poultry drugs are listed according to their pharmacotherapeutic classification. Identical products of different brands may appear together. The composition, Indication and dosage levels of all the drugs are listed.

Under biologicals the vaccine details and manufacturers details are furnished.

This book contains over 1000 drugs information apart from biologicals details and other useful information.

Every effort has been made to ensure accuracy of the information given in the book. However the users are advised to verify from relevant literature to guarantee perfection. The author and publisher accept no responsibility for any errors or omissions which might have occurred in this book.

B-Anand
