About the book

This book is written basically for goat farmers across India to keep their herds healthy and economically productive by understanding the diseases of goat their diagnosis and treatment. This book is also useful for those who do business with the goat farm or engage in the goat product marketing. A long term need was felt among goat farmers regarding disease related book having treatment of Indian author. The authors have tried to give complete treatment plan with dosages of goat so that the Veterinarian and goat farmer can calculate the appropriate dose for the treatment. Only important diseases have been incorporated in order to keep the book handy for goat owner. The objective of this effort is to explain how producers can understand the diseases of goat and achieve results through a set of best practices. In this book, goat producers are encouraged to develop a treatment plan for their own farm to implement best medicine practices that meet the needs of their goat farm. The information used for the development of this book for goat producers comes from different documents. List has been given at the end of the book. The authors do hope that after reading this book goat farm producer would be able to understand the diseases of goat and focus on the treatment in emergencies.
