

About the Book

Volume 1 and 2 : The purpose of this book is to convey to its readers some conception of the relative importance of the poultry industry as a branch of agriculture, the fundamental principles involved in various poultry practices, and up-to-date information concerning methods of poultry production. The more important economic factors in producing and marketing poultry products are give due consideration.

Success in poultry raising depends largely upon one's knowledge of the business and one's ability to produce and market poultry and poultry products efficiently. Fundamental principles must be understood to some extent at least before the most economical methods can be practiced intelligently. For this reason the major aspects of poultry production and marketing are discussed, first with respect to principles involved and second, with respect to practices to be followed.

This book is an attempt to integrate the facts of modern science for the benefit of students of poultry husbandry and practical poultrymen. The preparation of the book has been inspired in the spirit of rendering the greatest possible service to the poultry industry.

Volume 3 and 4 : The preparation of this book was originally undertaken in an attempt to point the way toward a reduction in mortality among poultry flocks, which number more than 5,000,000, and which contribute directly to the income of about 85 per cent of the farm families in the United States. We have earnestly endeavored to present material which is scientifically accurate, and yet not so technical as to be difficult to understand and put into practice. Important advances in poultry disease research have made succeeding editions necessary.

It is our belief that the health and efficiency of any flock depend not only on the eradication and control of transmissible diseases, but even more on soundness of body and inherited vigor, on adequate nutrition in the sense of complete rations which are reasonably well balanced, and on suitable environment including physical and sanitary protection. It is our further belief that the successful control of most diseases and parasites of poultry depends more on strict adherence to the principles of hygiene and sanitation and good management than on the use of medicinal agents and so-called cures. We have tried to convey to the reader our conception of what these beliefs involve by emphasizing their relation to the problem of prevention and control as it is discussed in connection with specific diseases and parasites.

For the benefit of students of the subject we have selected from among more than 7000 literature references which were consulted, something over 600 which in our opinion will be most helpful. Those which contain carefully selected or fairly complete bibliographies have been indicated by an asterisk (\*).

## **PREFACE**

---

The preparation of this book was originally undertaken in an attempt to point the way toward a reduction in mortality among poultry flocks, which number more than 5,000,000, and which contribute directly to the income of about 85 per cent of the farm families in the United States. We have earnestly endeavored to present material which is scientifically accurate, and yet not so technical as to be difficult to understand and put into practice. Important advances in poultry disease research have made succeeding editions necessary.

It is our belief that the health and efficiency of any flock depend not only on the eradication and control of transmissible diseases, but even more on soundness of body and inherited vigor, on adequate nutrition in the sense of complete rations which are reasonably well balanced, and on suitable environment including physical and sanitary protection. It is our further belief that the successful control of most diseases and parasites of poultry depends more on strict adherence to the principles of hygiene and sanitation and good management than on the use of medicinal agents and so-called cures. We have tried to convey to the reader our conception of what these beliefs involve by emphasizing their relation to the problem of prevention and control as it is discussed in connection with specific diseases and parasites.

For the benefit of students of the subject we have selected from among more than 7000 literature references which were consulted, something over 600 which in our opinion will be most helpful. Those which contain carefully selected or fairly complete bibliographies have been indicated by an asterisk (\*).

## CONTENTS

---

<i>Preface</i>	<i>v</i>
<b>1. THE MORTALITY PROBLEM</b>	<b>1-10</b>
The Magnitude of the Industry	1
What the Death Loss Is	3
The Problem of Disease Control	9
<b>2. THE NATURE OF DISEASE</b>	<b>11-18</b>
Definitions of Terms	11
The Nature of Disease-inducing Agents	13
Classification of Diseases	15
The Body Defenses	16
Methods of Disease Dissemination	16
<b>3. THE ANATOMY OF THE FOWL</b>	<b>19-32</b>
<b>4. POULTRY SURGERY</b>	<b>33-42</b>
Abdominal Surgery	34
Minor Surgical Operations	40
<b>5. DIAGNOSTIC METHODS</b>	<b>43-53</b>
Postmortem Examination	43
Laboratory Procedures	47
<b>6. BACTERIAL DISEASES</b>	<b>54-93</b>
Pullorum Disease (B. W. D.)	54
Fowl Tuberculosis	63
Fowl Cholera	70
Fowl Typhoid	74
Salmonella (Paratyphoid) Infections	77
Infectious Coryza	80
Erysipelas Infection	81

*This page left intentionally blank.*

Botulism	84
Brucella Abortus Infection	86
Staphylococcic Infections	87
Streptococcic Infections	90
Pfeifferella Anatipestifer in Young Ducks	91
Ulcerative Enteritis	92
<b>7. VIRUS DISEASES</b>	<b>94-132</b>
Fowl Pox	94
Infectious Laryngotracheitis	102
The Avian Leukosis Complex	108
Avian Pneumoencephalitis	118
(Newcastle Disease)	118
Fowl Plague	123
Infectious Bronchitis	126
Psittacosis	128
Avian Encephalomyelitis	129
Equine Encephalomyelitis	130
Infectious Sinusitis	131
<b>8. PROTOZOAN DISEASES</b>	<b>133-157</b>
Coccidiosis	133
Blackhead	144
Hexamitiasis	149
Trichomoniasis	151
Trichomoniasis of the Upper Digestive Tract	151
Trichomoniasis of the Lower Digestive Tract	152
Leucocytozoön Infection	154
Spirochetosis	155
Sarcosporidiosis	156
Malarial Infections	157
<b>9. NUTRITIONAL DISORDERS</b>	<b>158-169</b>
Pathological Effects of Faulty Nutrition	159
Deficiency Diseases	159
Other Nutritional Disturbances	166
<b>10. MISCELLANEOUS CONDITIONS</b>	<b>170-183</b>
Avian Monocytosis	170
Mycoses	171

Tumors of the Fowl	174
Diseases of the Reproductive Organs	176
Cannibalism	178
Edema of the Wattles	180
Frozen Combs and Wattles	180
Necrosis of the Beak	181
Pendulous Crop	181
Heat Prostration	182
Keel Cysts	182
Toxic Heart Degeneration	183
<b>11. POISONS</b>	<b>184-199</b>
Drugs and Chemicals	185
Molds and Fungi	192
Plants and Seeds	193
Insects	197
Other Poisonous Substances	198
<b>12. INTERNAL PARASITES</b>	<b>200-219</b>
Large intestinal Roundworms	201
Cecal Worms	205
Capillaria Worms	207
Other Intestinal Roundworms	208
Gizzard Worms	209
Spiral Stomach Worms	210
Tetramere Stomach Worms	211
Eyeworms	211
Gapeworms	212
Tapeworms	215
Flukes	218
<b>13. EXTERNAL PARASITES</b>	<b>220-238</b>
Lice	220
Mites	227
Ticks and Fleas	233
Other Ectoparasites	235
<b>14. CONTROLLING FLOCK MORTALITY</b>	<b>239-246</b>
<b>15. DRUGS</b>	<b>247-252</b>
Disinfectants	250
