

About the Book:

Volume 1 and 2: The purpose of this book is to convey to its readers some conception of the relative importance of the poultry industry as a branch of agriculture, the fundamental principles involved in various poultry practices, and up-to-date information concerning methods of poultry production. The more important economic factors in producing and marketing poultry products are give due consideration.

Success in poultry raising depends largely upon one's knowledge of the business and one's ability to produce and market poultry and poultry products efficiently. Fundamental principles must be understood to some extent at least before the most economical methods can be practiced intelligently. For this reason the major aspects of poultry production and marketing are discussed, first with respect to principles involved and second, with respect to practices to be followed

This book is an attempt to integrate the facts of modern science for the benefit of students of poultry husbandry and practical poultrymen. The preparation of the book has been inspired in the spirit of rendering the greatest possible service to the poultry industry.

Volume 3 and 4: The preparation of this book was originally undertaken in an attempt to point the way toward a reduction in mortality among poultry flocks, which number more than 5,000,000, and which contribute directly to the income of about 85 per cent of the farm families in the United States. We have earnestly endeavored to present material which is scientifically accurate, and yet not so technical as to be difficult to understand and put into practice. Important advances in poultry disease research have made succeeding editions necessary.

It is our belief that the health and efficiency of any flock depend not only on the eradication and control of transmissible diseases, but even more on soundness of body and inherited vigor, on adequate nutrition in the sense of complete rations which are reasonably well balanced, and on suitable environment including physical and sanitary protection. It is our further belief that the successful control of most diseases and parasites of poultry depends more on strict adherence to the principles of hygiene and sanitation and good management than on the use of medicinal agents and so-called cures. We have tried to convey to the reader our conception of what these beliefs involve by emphasizing their relation to the problem of prevention and control as it is discussed in connection with specific diseases and parasites.

For the benefit of students of the subject we have selected from among more than 7000 literature references which were consulted, something over 600 which in our opinion will be most helpful. Those which contain carefully selected or fairly complete bibliographies have been indicated by an asterisk (\*).

## **PREFACE**

---

The preparation of this book was originally undertaken in an attempt to point the way toward a reduction in mortality among poultry flocks, which number more than 5,000,000, and which contribute directly to the income of about 85 per cent of the farm families in the United States. We have earnestly endeavored to present material which is scientifically accurate, and yet not so technical as to be difficult to understand and put into practice. Important advances in poultry disease research have made succeeding editions necessary.

It is our belief that the health and efficiency of any flock depend not only on the eradication and control of transmissible diseases, but even more on soundness of body and inherited vigor, on adequate nutrition in the sense of complete rations which are reasonably well balanced, and on suitable environment including physical and sanitary protection. It is our further belief that the successful control of most diseases and parasites of poultry depends more on strict adherence to the principles of hygiene and sanitation and good management than on the use of medicinal agents and so-called cures. We have tried to convey to the reader our conception of what these beliefs involve by emphasizing their relation to the problem of prevention and control as it is discussed in connection with specific diseases and parasites.

For the benefit of students of the subject we have selected from among more than 7000 literature references which were consulted, something over 600 which in our opinion will be most helpful. Those which contain carefully selected or fairly complete bibliographies have been indicated by an asterisk (\*).

## CONTENTS

---

<i>Preface</i>	v
<b>1. GENERAL CONSIDERATIONS REGARDING THE TREATMENT OF POULTRY DISEASES</b>	<b>1-4</b>
<b>2. POULTRY HYGIENE</b>	<b>5-19</b>
<b>3. THE DIAGNOSIS OF THE DISEASES OF POULTRY</b>	<b>20-29</b>
External Symptoms, with a Table to Aid in the Identification of the Chief Classes of Poultry Diseases	20
Post-mortem Examination	22
Directions for Making a Post-mortem Examination	26
The Diagnostic Value of Certain Post-mortem Appearances	28
<b>4. POULTRY MATERIA MEDICA</b>	<b>30-33</b>
The Medicine Chest	30
Common Measure	33
<b>5. DISEASES OF THE ALIMENTARY TRACT</b>	<b>34-47</b>
Diseases of the Crop	34
Diseases of the Stomach ( <i>Proventriculus</i> )	38
Diseases of the Intestines	38
<b>6. POISONS</b>	<b>48-51</b>
<b>7. DISEASES OF THE LIVER</b>	<b>52-60</b>
<b>8. FOWL CHOLERA, FOWL TYPHOID AND FOWL PLAGUE</b>	<b>61-67</b>
<b>9. TUBERCULOSIS</b>	<b>68-78</b>
<b>10. INTERNAL PARASITES</b>	<b>79-87</b>
<b>11. DISEASES OF THE RESPIRATORY SYSTEM</b>	<b>88-108</b>
Anatomy and Physiology	88
<b>12. DISEASES OF THE CIRCULATORY SYSTEM</b>	<b>109-115</b>
Diseases of the Organs of Circulation	109

*This page left intentionally blank.*

<b>13. DISEASES OF THE NERVOUS SYSTEM</b>	<b>116-118</b>
<b>14. DISEASES OF KIDNEYS, RHEUMATISM AND LIMBERNECK</b>	<b>119-121</b>
<b>15. EXTERNAL PARASITES</b>	<b>122-140</b>
<b>16. DISEASES OF THE SKIN</b>	<b>141-147</b>
<b>17. DISEASES OF THE REPRODUCTIVE ORGANS</b>	<b>148-170</b>
Anatomy and Physiology	148
Diseases of the Ovary	151
Diseases of the Oviduct	156
<b>18. WHITE DIARRHEA</b>	<b>171-180</b>
<b>19. OTHER DISEASES OF CHICKENS</b>	<b>181-188</b>
<b>20. TUMORS</b>	<b>189-195</b>
<b>21. POULTRY SURGERY</b>	<b>196-199</b>
<b>22. DIFFERENTIAL DIAGNOSES FOR DISEASES OF POULTRY BASED ON ORGAN SYSTEMS</b>	<b>200-250</b>
Introduction	200
Avian Reaction to Tissue Injury - Inflammation	201
Respiratory System	202
Digestive System including Liver and Pancreas	207
Nervous system	213
Special Senses	216
Integumentary System (Skin and Feathers) Anatomy and Diseases	234
Immune System	236
Urogenital Systems	238
Cardiovascular System	243
Musculoskeletal System	245
Endocrine System	249
<b>23. DEVELOPMENT OF RECOMBINANT FLAGELLAR ANTIGENS FOR SEROLOGICAL DETECTION OF SALMONELLA ENTERICA SEROTYPES ENTERITIDIS, HADAR, HEIDELBERG, AND TYPHIMURIUM IN POULTRY</b>	<b>251-267</b>
Joseph Minicozzi, Susan Sanchez, Margie D. Lee, Peter S. Holt, Charles L. Hofacre and John J. Maurer	
Introduction	252
Results and Discussion	254
Experimental Section	259
Conclusions	263
References	264
<i>Glossary of Technical Terms</i>
