Financial Management

 Indian Text Edition

The immensely successful book has been designed as a comprehensive textbook cum reference book on financial management. It has been written in accordance with the requirements of students pursuing the M.B.A., C.A., I.C.W.A., C.F.A., C.S., M.Com. B.B.A., and other post graduate and graduate level courses. It will also be useful to practicing business executives and officers who want to improve their knowledge of financial management.

Salient Features

- The 2nd edition contains cases in the form of Conceptual Cases and Business Application Cases developed for select chapters.
- Four new chapters 'Valuation of Securities', 'Risk and Return', 'Corporate Risk Management' and 'Options' added. Majority of chapters enlarged to provide a wider coverage.
- Number of Illustrations (solved examples) increased in most of the chapters. New Problems (unsolved exercises) also added.
- In the last chapter, 'Cases in Financial Management', comprehensive cases have been introduced. Out of these, three cases along with illustrated case analysis given. Additionally, ten unsolved comprehensive cases are also given.
- All topics, illustrations, problems, tables and diagrams are decimally numbered for easy location.
- Self-evaluation exercises have been appended at the end of each chapter.
- The student CD included with present edition contains solutions to the unsolved exercises given at the end of each chapter.
- Designed to facilitate teaching with the book, the Tutor CD includes power point slides to enliven the classrooms along with solutions of cases.
