Acknowledgments. Every author owes a great deal to others, and I am no exception. First and foremost, I would like to acknowledge the help on this as well as many other writing projects over the years that I received from my deceased friend and colleague, Professor Richard M. Hodgetts of Florida International University. Next, I would like to acknowledge the total support and standards of excellence provided by my friend and longtime department chairman, Sang M. Lee and my former colleague now at the University of Washington, Bruce Avolio. Special thanks goes to Cathy Watson from the Management Department staff who has been very helpful to me over the years. I can never forget the education, encouragement, and scholarly values I received from Professors Henry H. Albers and the deceased Max S. Wortman when starting out in my academic career. Over the years, I have been very lucky to have been associated with excellent doctoral students. I would like to thank them all for teaching me as much as I have taught them. In particular, I would like to thank Don Baack, Steve Farner, and Suzanne Peterson who have helped on previous editions. I am also very grateful to those professors who used the previous editions of the book and gave me valuable feedback for making this revision. The reviewers for this edition are Charles B. Daniels, Old Dominion University; Laura Finnerty Paul, Skidmore College; and James Harbin, Texas A&M University–Texarkana. Finally, as always, I am deeply appreciative and dedicate *Organizational Behavior*, twelfth edition, to my wife and now grown children and their families, who have provided me with a loving, supportive relationship and climate needed to complete this and other projects over the years.
